

Municipal Benchmarking Study

REGINA

OVERALL RANKING

Regina moved from the #5 spot in the 2022 study into the #4 spot in the 2024 report. The city did take up some of the recommendations from the 2022 report, resulting in its move up the rankings.

Rank	Municipality	Planning features (1=Best)	Approvals timelines (1=Best)	Government charges Low-Rise (1=Lowest)	Government charges High-Rise (1=Lowest)
1	Edmonton	6	4	8	9
2	Halifax	1	13	6	2
3	London	5	7	9	15
4	Regina	14	3	5	8
5	Calgary	7	6	13	10
6	Moncton	18	2	1	1
7	Charlottetown	22	5	2	3
8	Kelowna	15	8	11	5
9	Kamloops	21	10	7	6
10	Surrey	11	9	14	13
11	Saskatoon	16	1	18	7
12	St. John's	20	12	3	4
13	Ottawa	8	17	10	16
14	Winnipeg	23	14	4	11
15	Oakville	4	15	21	21
16	Burnaby	17	18	16	14
17	Vancouver	12	11	17	12
18	Brampton	9	16	20	20
19	Hamilton	10	23	12	17
20	Pickering	13	19	19	18
21	Toronto	3	22	23	23
22	Markham	2	20	22	22
23	Bradford West Gwillimbury	19	21	15	19

This study compares 23 Canadian municipalities, examining how their processes, approvals timelines, and government charges and fees contribute to housing affordability and supply issues in major housing markets across Canada.

Whether at the top or the bottom of the list, each city can learn from best practices of others and continue to improve.

RANKINGS

The ranking reads as a report card to show which municipal governments are currently leading in which of the three pillars of the study (planning features, approvals timelines, and government charges), and provides an overall ranking. This ranking does not assess anything beyond what was analyzed and is not reflective necessarily of the engagement and cooperation between industry and local governments.

PLANNING FEATURES

Each municipality is scored on whether they have features that can support an efficient planning approvals system, and increase transparency for developers, the public, or other interested parties. This edition of the study makes some modifications to the review of features from the previous study. After an internal review and feedback of the scoring process from the previous study, the number of themes that include features within them has been reduced from five (5) to three (3). The total number of features being reviewed has been reduced from 16 to 13.

OVERALL SCORE FOR PLANNING FEATURES

Theme	Feature	Score
APPLICATION PREPARATION	(1) Application Support Materials (2) Zoning By-law in Interactive Map (3) Zoning By-law in Machine Readable Format (4) Staff Contact Information	75%
APPLICATION SUBMISSION	(1) Planning Application Submission Options (2) Planning Application Payment Options (3) Building Permit Submission Options (4) Building Permit Payment Options	56%
APPLICATION TRACKING	(1) Active Application Information Website (2) Status Indicator for Applications (3) Historical Planning Data Availability (4) Interactive Map of Planning Applications (5) Availability of Application Submission Documents	60%

MUNICIPAL CHARGES

The report provides a high-level overview of a blended rate of government charges levied by municipal governments and attempts to quantify the costs these charges and fees generate for developers, home builders, and ultimately, home buyers.

LOW-RISE

\$29,500 / UNIT

HIGH-RISE

\$9,000 / UNIT

**3.2
MONTHS**

APPROVALS TIMELINES

We estimate typical approval timelines for development applications – from complete application to planning approval. The nature of the ‘planning approval’ can take many forms.

Delays in approvals impact housing affordability. Months of delays can add tens of thousands of dollars to the cost of a home.

INDIRECT COSTS DUE TO DELAYS

There are indirect costs that accumulate on a development as its application goes through the application process including: property taxes, financing costs, and cost escalation of construction materials and labour due to inflation.

LOW-RISE

\$3,034 / UNIT / MONTH

HIGH-RISE

\$1,585 / UNIT / MONTH

SUCSESSES AND CHALLENGES

To achieve a fourth-place ranking, Regina has several elements working well, and others requiring improvement.

WORKING WELL

TOTAL DEVELOPMENT FEES FELL

Total fees fell in Regina (-\$4,900) which largely reflects a drop in residential land values, and resulting decline in bonus density/land value taxes.

ZONING REFORMS

Regina is working to:

- eliminate exclusionary zoning, increase permitted heights for existing mid-and high density zones and eliminate parking requirements;
- Introduced Primary Intensification Areas that permit 6 storey development within 200m of main transit routes; and
- Also introduced Secondary Intensification Areas that permit 4 storey development within 800m of transit hubs.

UPDATES TO WEBSITE

Regina has made updates to it's website based off feedback and analysis of the 2022 report. Improvements include making the development guide easier to read with many general improvements, including better linking to planning help including checklists.

NEEDS IMPROVEMENT

APPLICATION SUBMISSION PROCESS AND TRACKING STILL NEEDS WORK

Regina only scored 56% on its application submission process and only 60% for application tracking. However, plans are in place to allow for planning applications to be submitted online by 2025.

ABOUT THE CHBA MUNICIPAL BENCHMARKING STUDY

www.chba.ca/municipal-benchmarking

The Municipal Benchmarking Study was commissioned by the Canadian Home Builders' Association (CHBA) and delivered by Altus Group. The study assessed municipalities on features, approvals and government charges, drawing out best practices. All cities can learn from each others' experiences, continually improving policies and operations to increase housing supply and affordability.

The 2024 edition of the study provides further detail on how a municipality's performance on approval timelines, municipal fees, and planning features influence housing outcomes, including affordability and availability of housing for young families, and the total cost implications of these municipal processes and policies. There was also greater direct participation from most municipalities to help support the research.

This edition also includes two additional areas of scoring: indirect costs of the residential development application process, and a housing outcome measure. The chart below shows that in general, **municipalities that score low on the municipal benchmarking index have worse housing outcomes**. Higher Municipal Benchmark Index scores are positively related to a blended measure of improved housing affordability, lower suppressed household formation rates, a balanced vacancy rate, and net positive municipal migration. Poor Benchmark scores create a high likelihood that a municipality experiences relatively poor housing outcomes—the opposite of the four blended measures. Outlier cities like Halifax and London illustrate how housing policy changes for new supply need time before measurable housing outcomes improve.

"This study is intended to facilitate conversations among all levels of government, especially municipal governments, on how land-use planning-related factors can be improved to encourage more housing supply, and help improve affordability for Canadians across the country. Municipalities often face similar challenges, and learning from each other can help improve housing outcomes for all."

**-Kevin Lee
CEO, CHBA**

Housing Outcomes Index VS. Municipal Benchmarking Index, 2024

NOTES

The research started with data from June 2022 onwards (to avoid overlap with the previous study). The study does not include any potential impacts on housing as a result of the changes a municipality may have made as a result of receiving money from the federal Housing Accelerator Fund.

The results are independent of the quality of the relationship between the municipal government and the residential construction industry.
